Aircraft Electric Motors appoints Cranefield Enterprise, LLC as an Official Company Representative to provide customer sales and service support to new and existing clients throughout Asia-Pacific Region

July 24, 2026 – Miami Lakes, Florida USA

Aircraft Electric Motors is pleased to announce the appointment of **Cranefield Enterprise** as our official sales representatives for the Asia-Pacific region.

Aircraft Electric Motors, located in Miami Lakes, Florida, is an FAA and EASA/UK CAA Part 145 approved repair station that also provides manufacturing services to a number of Fortune 500 companies. Founded in 1972, AEM is an independently owned aerospace facility staffed by 175 dedicated employees who support our extensive capabilities. AEM provides services for fixed-wing and rotorcraft for military, commercial and corporate aerospace applications. AEM specializes in manufacturing, rewind/repair, and machining of electrical sub-components for AC and DC aerospace electrical generator and motor parts, including rotors, armatures, stators, exciters, fields, coils, transformers and solenoids.

Cranefield Enterprise, founded by Dean Wang, will provide sales and customer support to new and existing aviation clients throughout the Asia and Pacific region. Mr. Wang has a storied aviation career, spanning nearly 30 years, serving the aerospace industry throughout the world.

“Cranefield Enterprise, led by Dean Wang, will help expand and strengthen our partnerships in commercial, corporate, military and helicopter electrical component sales. We look forward to a long and mutually beneficial partnership!” – Darrin Avick, Senior Director of Sales & Business Development.

For over 50 years Aircraft Electric Motors has provided the absolute best in manufacturing, rewind and repair of all types of aircraft electrical components, while not competing with accessory shops or other customers we serve. Our modern, state of the art 60,000 square foot facility, is dedicated to offering full repair, overhaul and manufacturing capabilities to our global aerospace client base.
